Summary

Dedicated Full-Stack Developer adept in Next.js, JavaScript, and Tailwind CSS. Eager to contribute with robust web development skills, focusing on performance, scalability, and continuous learning in Docker and system architecture. Excel at teamwork and adaptable to dynamic environments.

Experience

Full Stack Developer - Reallist Pvt. Ltd.

June 2024 - Present

- Optimized backend queries by implementing bull.js and Redis, improving overall system performance by 25%.
- Created a dynamic booking system for reallist.ai, boosting user engagement and operational efficiency by 35%.
- Migrated the application from React 16 to React 18, resulting in a 20% performance boost.

Full Stack Intern - Bizzyka Pvt. Ltd.

January 2024 - April 2024

- Led the development of Bizzyka's ERP website using Next.js and Tailwind CSS, improving user engagement by 18%.
- Developed and maintained the backend for a horoscope application with Express.js and Prisma ORM.
- Optimized frontend performance on The Enablers website by integrating ShadCUI components, reducing page load times by 20%.

Front End Intern - Weareengineer Pvt. Ltd.

March 2023 - October 2023

- Improved UI and implemented a profile section, increasing user engagement by 15% and reducing page load times by 10%.
- Engineered a healthcare project's backend using Express.js and Next.js, improving system efficiency by 20%.
- Improved scalability by 30% through utilizing Zustand and Next.js in cross-functional team collaborations.

Projects

Ninjanex (Desktop App) - Github

- Developed a cross-platform desktop application using Electron.js to ensure compatibility on multiple operating systems with a single codebase, reducing development time and maintenance overhead.
- Built and maintained RESTful APIs using Express.js with Prisma ORM and PostgreSQL to simplify database management, ensuring reliable data transactions and scalability as user data grows.
- Established automated workflows with Jest, ESLint, and Webpack, resulting in faster debugging, cleaner code, and smoother deployments, minimizing production issues.

Twitter Clone (Full Stack Website) - Github | Link

- Created a responsive Twitter clone with Next.js for server-side rendering, which improved initial load times and SEO, and Tailwind CSS to accelerate the styling process with utility-first CSS.
- Integrated secure user authentication with Google OAuth, reducing the need for custom authentication solutions and ensuring a smooth login experience.
- Designed a backend with Express.js and PostgreSQL, using GraphQL for efficient data fetching, which reduced over-fetching and enhanced frontend performance.

Technical Skills

Front-End: Typescript, React Native, Next.js, Redux, Tailwind CSS.

Back-End: Express.js, Node.js, Firebase, Prisma.

Tools And Software: Git, Bash, Shell Scripting.

DevOps: Docker, Kubernetes, GitHub Actions, CI/CD Pipelines.

Database: PostgreSQL, MongoDB, Redis.

Education

North Maharashtra University, Jalgaon

2021 - 2025

Bachelor of Engineering (Computer Science) - CGPA: 7.8 / 10
